Dear Mr. Weisberg,

I have just completed interpreting your book "Whitewash". I fervently support your right as an American Citizen to question the preponderance of inarticulate and inexplicable matters surrounding the entire case.

I personally suggest you acquaint yourself to the unequivocal distinction between an analytic judgement and a synthetic one. You are inadvertently "coloring" as in a lucid manner you have shown the commission has done. Your denunciation of the validity of the Warren Commissions findings & endorse whole-heartedly. Their "overlooking policy" is totally inexcusable and incredible.

I affirm my recalcitrance in this matter and would like to know in your considered opinion what can be done to expedite an "objective" investigation of the entire repugnant & historic matter.!!

Sincerely yours,
Philip Ten[illegible]
